

Demonstration of Proposed Features

Date	5 July 2026
Team ID	
Project Name	HDI Insight AI – Human Development Index Prediction System
Maximum Marks	1 Mark

Demonstration of Proposed Features:

The proposed features of the HDI Insight AI system were successfully implemented and demonstrated during the project. The application accepts socio-economic input parameters such as Life Expectancy, Expected Years of Schooling, and Gross National Income, preprocesses the input data, and predicts the Human Development Index (HDI) using a trained Linear Regression model. The predicted HDI score and its corresponding development category are displayed through an interactive and user-friendly web interface. All proposed functionalities

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Data Input Form	Accepts Life Expectancy, Expected Years of Schooling, and Gross National Income from the user.	Implemented	Yes	Working Successfully
2	Data Preprocessing	Handles missing values using the SimpleImputer before prediction.	Implemented	Yes	Successfully Integrated
3	HDI Prediction	Predicts the Human Development Index using the trained Linear Regression model.	Implemented	Yes	Accurate Prediction Generated
4	Result Display	Displays the predicted HDI score and corresponding development category.	Implemented	Yes	Output Displayed Correctly
5	Responsive User Interface	Provides a clean and user-friendly web interface using HTML and CSS.	Implemented	Yes	Responsive Design
6	Model Integration	Integrates the trained model with the Flask application using Joblib.	Implemented	Yes	Successfully Deployed

Feature Implementation Summary:

Total Features Proposed	Value
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
